

# System Requirements and Implementation Options

## How to Use

Use this information as a guide to identify the hardware and software components needed to implement ComplianceOne. Please review this document in its entirety. Please contact Wolters Kluwer Financial Services if you have any questions regarding specific configurations.

All requirements are for systems running ComplianceOne only. You will need to take into consideration any additional software that will be running in your environment, as this will increase the listed requirements. Please review the additional notes at the end of this document for further explanations and information.

These requirements are subject to change without notice.

Visit our Software Support Web site at <http://Support.WoltersKluwerFS.com> for updates to the ComplianceOne System Requirements.

This publication was written for ComplianceOne.

**Publication Information / Version**

ComplianceOne™ Solution  
System Requirements and Implementation Options  
Document Version 1.2  
July 2011

**Distributed Subject to Terms of a License or other Agreement**

The contents of this publication, including its appendices, exhibits, and other attachments, as updated or revised, are highly confidential and proprietary to Wolters Kluwer Financial Services, Inc. or its subsidiaries or affiliates (“Wolters Kluwer Financial Services”). This publication is distributed pursuant to a Non-Disclosure Agreement, Evaluation Agreement, License Agreement and/or other similar agreement(s) with Wolters Kluwer Financial Services, Inc. or its subsidiary or affiliate. Unless otherwise specifically provided in such agreement(s), the reproduction of this publication is strictly prohibited. Use and distribution of this publication are also subject to the responsibilities and obligations of such agreement(s), which require confidential treatment of this publication and its contents.

Information in this guide is subject to change without notice and does not represent a commitment on the part of Wolters Kluwer Financial Services.

**Do Not Reproduce or Transmit**

Unless otherwise specifically authorized in the agreement or license under which this publication has been provided, no part of this publication may be posted, played, transmitted, distributed, copied or reproduced in any form or by any means, electronic or mechanical, including photocopying, recording, or retaining on any information storage and retrieval system, without prior written permission from Wolters Kluwer Financial Services.

Requests for permission to reproduce content should be directed to Wolters Kluwer Financial Services, Inc., Corporate Legal Department, by telephone at 1-800-397-2341.

**Not a Substitute for Legal Advice**

This publication is intended to provide accurate and authoritative information about the subject matter covered based upon information available at the time of publication. Examples given in this publication are for illustrative purposes only.

Development of this publication and the software (including forms, disclosures, reports, and other documents generated by the software) or other products that it describes was based on Wolters Kluwer Financial Services' understanding of various laws, regulations and commentaries. Wolters Kluwer Financial Services cannot and does not guarantee that its understanding is correct.

This publication is not intended, and should not be used, as a substitute for legal, accounting, or other professional advice. Wolters Kluwer Financial Services is not engaged in providing legal, accounting or other professional services. If legal or other professional assistance is required, you should seek the services of a competent professional. We encourage you to seek the advice of your own attorney concerning all legal issues involving the use of this publication and any products described in this publication. If your interpretations or your counsel's interpretations are contrary to those expressed in this publication, you should of course, follow your/your counsel's interpretations.

The following notice is required by law:

**WOLTERS KLUWER FINANCIAL SERVICES' PRODUCTS AND SERVICES ARE NOT A SUBSTITUTE FOR THE ADVICE OF AN ATTORNEY.**

**Warranty Disclaimer**

**Except only for the warranties (if any) expressly set forth in the agreement(s) under which this publication is provided (i.e., your agreement or license for the described product), this publication is provided “as is”, and Wolters Kluwer Financial Services makes no warranty, express, implied, by description, by sample or otherwise, and in particular and without limitation, makes no implied warranties of merchantability or fitness for purpose. No modifications to this Warranty Disclaimer are authorized unless in writing and signed by the President or a Vice President of the Wolters Kluwer Financial Services entity licensing the product described in this publication.**

## Standalone Implementation

### *Software Requirements: Operating Systems \*\**

- Windows XP Professional (32-bit)
- Windows Vista Business (32-bit)
- Windows 7 Professional (32-bit)
- Windows 7 Professional (64-bit)

### *Other Required Software*

- Internet Information Services (IIS)\*\*
- Microsoft .NET 2.0 Framework\*\*\*
- Microsoft .NET Framework 4\*\*\*
- ASP.NET MVC 3
- Microsoft Silverlight 4.0
- Microsoft Internet Explorer 6.0 or greater\*\*
- Microsoft SQL Server 2005 Express
- Microsoft SQL Server 2008 R2 Express (64-bit)

### *Hardware Requirements*

- 2.66 GHz processor or greater (3.0 GHz processor or greater is recommended)\*
- 1 GB RAM or greater (2 GB RAM or greater recommended)\*
- At least 5 GB available hard disk space (7 GB or greater recommended)
- 24X speed or greater CD-ROM Drive

## Network - Small Implementation Server (Up to 15 concurrent users)

The specifications listed in this section are for an application server to run ComplianceOne only. You will need to take into consideration any additional software that will be running in your environment and size appropriately. Due to security and workload concerns, application software, such as ComplianceOne, should not be installed on an Active Directory Server / Domain Controller. If a server class computer is not available, ComplianceOne can be installed on a workstation computer in a peer-to-peer configuration to act as the server for ComplianceOne clients. It is recommended to install to a computer that is a member of a domain as installations in a Workgroup may not work correctly.

Peer-to-peer configurations may be limited to 5 concurrent users. However, if you are running at least our recommended system requirements, up to 15 concurrent users may access ComplianceOne on a Network - Small Implementation server. If more concurrent users are desired, refer to the Network- Large Implementation Server option.

Consult with Wolters Kluwer Financial Services to ensure ComplianceOne will work in your environment. Please review the additional notes at the end of this document for further explanations and information.

### *Software Requirements: Operating Systems \*\**

- Windows XP Professional (32-bit)
- Windows Vista Business (32-bit)
- Windows 7 Professional (32-bit)
- Windows 7 Professional (64-bit)
- Windows Server 2003 Standard or Enterprise (32-bit)
- Windows Server 2008 Standard or Enterprise (32-bit)
- Windows Server 2008 R2 Standard or Enterprise (64-bit)

### *Other Required Software*

- Internet Information Services (IIS)\*\*
- ASP.NET MVC 3
- Microsoft .NET 2.0 Framework\*\*\*
- Microsoft .NET Framework 4\*\*\*
- Microsoft Internet Explorer 6.0 or greater\*\*
- Microsoft SQL Server 2005 Express
- Microsoft SQL Server 2008 R2 Express (64-bit)

### *Hardware Requirements*

- 2.66 GHz processor or greater (3.0 GHz processor or greater is recommended)\*
- 2 GB RAM or greater (3 GB RAM or greater recommended)\*
- At least 5 GB available hard disk space (7 GB recommended)
- 24X speed or greater CD-ROM Drive

## Network - Large Implementation Server (Greater than 15 concurrent users)

The specifications listed in this section are for an application server to run ComplianceOne only. You will need to take into consideration any additional software that will be running in your environment and size appropriately. The specifications listed in this section are sized for a system with 15 concurrent users.

Due to security and workload concerns, application software, such as ComplianceOne, should not be installed on an Active Directory Server / Domain Controller.

Consult with Wolters Kluwer Financial Services to ensure ComplianceOne will work in your environment. Please review the additional notes at the end of this document for further explanations and information.

### *Software Requirements: Operating Systems \*\**

- Windows Server 2003 Standard or Enterprise (32-bit)
- Windows Server 2008 Standard or Enterprise (32-bit)
- Windows Server 2008 R2 Standard or Enterprise (64-bit)

### *Other Required Software*

- Internet Information Services (IIS)\*\*
- ASP.NET MVC 3
- Microsoft .NET 2.0 Framework\*\*\*
- Microsoft .NET Framework 4\*\*\*
- Microsoft Internet Explorer 6.0 or greater\*\*
- Microsoft SQL Server 2005 Standard \*\*(32-bit)
- Microsoft SQL Server 2008 Standard \*\*(32-bit)
- Microsoft SQL Server 2008 R2 Standard\*\* (64-bit)

### *Hardware Requirements*

- 2.66 GHz processor or greater (3.0 GHz processor or greater is recommended)\*
- 2 GB RAM or greater (3 GB RAM or greater recommended)\*
- At least 5 GB available hard disk space (7 GB or greater recommended)
- 24X speed or greater CD-ROM Drive

## Network - Wide Area Network (WAN) Implementation (Terminal Services/Server)

To run effectively in a Wide Area Network (WAN) environment, ComplianceOne requires sufficient bandwidth for acceptable performance. At this time, Terminal Services/Server is required for Wide Area Network (WAN) implementations. The specifications listed in this section are sized for a system with 15 concurrent users.

ComplianceOne must be installed on a separate application server (see Network - Large Implementation Server for requirements) and not the server hosting Terminal Services. Only the ComplianceOne client files are installed on the Terminal Server.

Additionally, Citrix XenApp can be added on top of the Microsoft Terminal Services to allow more options for workstation connectivity and administration. Workstations that connect to Terminal Server need to meet the requirements set by Microsoft or Citrix. These requirements are less than the requirements for a local area network client allowing you to use legacy equipment without needing to do hardware upgrades to your workstations. Refer to your technical consultant or visit <http://www.microsoft.com> or <http://www.citrix.com> for Terminal Services/Server and workstation specifications.

Consult with Wolters Kluwer Financial Services to ensure ComplianceOne will work in your environment. Please review the additional notes at the end of this document for further explanations and information.

### *Software Requirements: Operating Systems \*\**

- Windows Server 2003 Standard or Enterprise (32-bit) with Terminal Services
- Windows Server 2008 (32-bit) with Terminal Services
- Windows Server 2008 R2 Standard or Enterprise (64-bit) with Remote Desktop Services

### *Other Required Software*

- Microsoft .NET 2.0 Framework\*\*\*
- Microsoft .NET Framework 4\*\*\*
- Microsoft Internet Explorer 6.0 or greater\*\*
- Microsoft Silverlight 4

### *Hardware Requirements*

- 2.66 GHz processor or greater (3.0 GHz processor or greater is recommended)\*
- 2 GB RAM for the operating system and at least 100 MB RAM per user connection\*
- At least 5 GB available hard disk space (7 GB or greater recommended)
- 24X speed or greater CD-ROM Drive

## Network - Clients

These requirements apply to all Local Area Network (LAN) client workstations regardless of the server. For Wide Area Network (WAN) implementations, refer to the Network - Wide Area Network (WAN) Implementation section earlier in this guide.

The specifications listed in this section are for a computer to run ComplianceOne only. You will need to take into consideration any additional software that will be running in your environment and size appropriately.

Consult with Wolters Kluwer Financial Services to ensure ComplianceOne will work in your environment.

Please review the additional notes at the end of this document for further explanations and information.

### *Software Requirements: Operating Systems \*\**

- Windows XP Professional (32-bit)
- Windows Vista Business 32-bit
- Windows 7 Professional (32-bit)
- Windows 7 Professional (64-bit)

### *Other Required Software*

- Microsoft .NET 2.0 Framework\*\*\*
- Microsoft .NET Framework 4\*\*\*
- Microsoft Internet Explorer 6.0 or greater\*\*
- Microsoft Silverlight 4

### *Hardware Requirements*

- 2.66 GHz processor or greater (3.0 GHz processor or greater is recommended)\*
- 1 GB RAM or greater (2 GB RAM or greater recommended)\*
- At least 500 MB available hard disk space (2 GB or greater recommended)\*
- 24X speed or greater CD-ROM Drive

## Printer Requirements

- PCL5 or PCL6 compatible laser printer (Example: HP 4000 Series, 8000 Series, and Lexmark Optra Series.)
- Two programmable paper trays, one for letter size paper and one for legal size paper.
- Printer memory:
  - 8 MB installed for 300 dpi resolution
  - 16 MB installed for 600 dpi resolution
  - 32 MB installed for 1200 dpi resolution
- T1 communication is recommended for Wide Area Network printing

### *Note*

Due to the large variety of printers available in the market today, we are unable to test our programs with every printer.

Printers that are NOT supported include, but not limited to: HP L Series, HP1000 Series, HP2000 Series, Okipage Series, and Brother HL 1000 Series. Multi-purpose (printer, copier, fax) printers may meet the above requirements; however, we do not recommend using multi-purpose printers with our software and may not be able to assist with problems printing to these printers.

### **Key**

\* These requirements are for systems running ComplianceOne only. A higher megahertz (MHz) processor and or more random access memory (RAM) have shown to improve the overall performance of ComplianceOne. Adding additional CPUs may also improve overall performance. Consult with your technical staff if you will be running additional applications, as this will increase the listed requirements.

\*\* Acquiring and installing these programs is the responsibility of your network administrator or technical consultant. Wolters Kluwer Financial Services is not responsible for providing or implementing these programs. Also, Wolters Kluwer Financial Services cannot provide assistance with implementing these programs beyond the information contained in the ComplianceOne Installation Instructions. Contact Microsoft Support for assistance, if needed.

\*\*\* Microsoft SQL Server 2005 Express, Microsoft .NET 2.0 Framework, and Microsoft .NET Framework 4 are supplied on the ComplianceOne installation CD.

### **Additional Notes**

#### *Microsoft Word*

Microsoft Word 2003 or newer must be installed in order to modify dynamic documents within ComplianceOne. Microsoft Word must be installed on the client. If are you using a terminal or Citrix server, then Word must be installed on the terminal server, even if Word is installed on the local machine. Note that when installing on a terminal server or Citrix server client, be sure to obtain the appropriate licensing for the installation of Word.

#### *Microsoft Office Outlook*

Microsoft Outlook is needed for ComplianceOne email functionality, which provides the ability to email documents. The Microsoft Office Outlook 2003 32-bit version is required to use email

functionality within ComplianceOne. The 64-bit version of Microsoft Office Outlook 2003 or new is not compatible at this time.

### ***Port 80***

Web sites deployed on the same server as ComplianceOne and using port 80 will not function properly and also interfere with the functioning of the ComplianceOne web services. As such, we do not currently support deploying ComplianceOne web services into web servers where other sites are configured to use port 80. We also do not currently support deploying ComplianceOne web services into web servers that are running Microsoft SharePoint.

### ***Internet Access***

High speed Internet access is required to use some components of ComplianceOne as well as for remote installation and support.

### ***Service Packs***

The most current service pack is required for all Microsoft applications.

### ***Backup Restore***

Backups are the sole responsibility of the institution. Your backup software may require an additional module to allow backing up of database files.

### ***Novell NetWare***

ComplianceOne cannot be installed to a Novell NetWare file server because ComplianceOne utilizes Microsoft IIS to create the screens and Microsoft SQL Server to manage the database. These components cannot be installed to or run from a Novell NetWare file server.

### ***Windows Millennium Edition, Windows XP Home and Windows Vista Home***

These operating systems are designed strictly for home use and are not supported.

### ***Microsoft Small Business Server and Microsoft BackOffice Server***

These operating systems are designed strictly for small business applications and are not supported.

### ***Active Directory Server / Domain Controllers***

Good networking practice dictates that application software, such as ComplianceOne, should not be installed on a Domain Controller. This is due to security and workload concerns.

### ***Exchange Server***

ComplianceOne is not compatible running on Exchange Server.

### ***Upgrading Windows Operating Systems***

If you have upgraded or are planning to upgrade your Windows operating system, please note the following: Although Microsoft states they support an upgrade process from a previous version of the operating system, in order to install the Microsoft components to run ComplianceOne properly, it is required to perform a new installation (or clean install) of the new operating system. You should not upgrade over your existing installation of Windows. This means that the computer's hard drive must be re-formatted prior to installing Windows. You should back up your data, format the hard drive, install Windows, reinstall your applications and then restore your data from backup.
