

TSoft SBA FormMaster+

Hardware and Software System Requirements

TSoft SBA FormMaster+ requires the following:

Client / Stand-alone Requirements

- Windows® 2000 Professional or Windows® XP Professional
- 256 MB RAM (Required); 512 MB RAM or higher (Recommended)
- Pentium 500 MHz CPU or higher
- CD-ROM drive
- 1 GB of hard disk space.

Server Requirements

- Windows® 2000 Server or Windows® Server 2003
- Pentium 500 MHz CPU or higher
- 512 MB RAM (Required)
- CD-ROM drive
- 1 GB of hard disk space

Printer Requirements

- Laser printer emulating an HP LaserJet 4 or higher
- PCL5 or higher compatible
- Duplex unit recommended (not required)
- 8 MB of printer memory (minimum)
- DeskJet, bubble jet or other non-Laser printers are not supported
- Two programmable paper trays (one for letter size, one for legal size paper) recommended.

Additional Notes

- BSI recommends using the latest service pack for each operating system listed above.

- If you have questions with deploying TSoft under Terminal Services or Citrix Metaframe, please contact the SupportLine technology team at (800) 274-2711 Ext. 4044 for a custom terminal server hardware recommendation based on your specific environment.
